Material specification ARK2

No.	Designation	Pieces	Material	Material-No. / DIN	ASTM / AISI
010	body	1	ductile iron / PFA	EN-JS1049 (GGG-40.3) / DIN EN 1563	A 395
020	disc				
	DN 50 - 80, DN 2" - 3"	1	PFA		
	DN 100 - 400, DN 4" - 16"	1	ductile iron / PFA	EN-JS1049 (GGG-40.3) / DIN EN 1563	A 395

Assembly Instruction ARK2

The general installation and maintenance instructions must be observed.

1. Insert disc **(020)** into the body **(010)**. Please observe that the flat surface of the disc is placed on the sealing surface of the body.
2. Place two studs **(A)** of the piping connection at the lowest position including the hexagon nuts.
3. Place the body **(010)** on the bolts **(A)** between the flanges of the pipe. While transportation make sure that the disc **(020)** is protected.
4. Assemble all bolts and screw the hexagon nuts lightly.
5. Position the raised face of the body **(010)** to the raised face of the piping.
6. Tighten the hexagon nuts according to the recommended tightening torques by using the criss-cross method.

Disassembly Instruction ARK2

For all jobs which are to be carried out on an installed valve, the works safety requirements and the general accident prevention instructions must be observed. Moreover, the general installation and maintenance instructions for atomac fluor-carbon resin lined valves must be considered.

1. Before disassembling the valve it has to be cleaned.
2. Unscrew the hexagon nuts of the pipe connection (**A**) except the lower bolts and remove the studs.
3. Remove the check valve out of the pipe, and make sure that the disc (**020**) is protected.
4. Place the body (**010**) on a rubber mat and remove the disc (**020**).
